Exercise Sheet 7: Writing & Typesetting
Maximilian Marx, Markus Krötzsch
Academic Skills in Computer Science, 2019-05-28, Summer Term 2019

Please prepare exercise 7.4 for the exercise session on 2019-06-04.

Exercise 7.1. Find the paper "Unifying Tone System Definitions: Ordering Chromas" by T. Schlemmer. Read the introduction and find a "headline" for each paragraph. Then write a new introduction for the paper.

Exercise 7.2. Typeset your solution to exercise 7.1. Then rewrite and typeset the preliminaries of that paper.

Exercise 7.3. Typeset the following formulae:

$$\neg A \sqcap \exists R^-.A \sqcap (\leq 1\ R) \sqcap \forall (R^-)^+.(\exists R^-.A \sqcap (\leq 1\ R)) \tag{3.1}$$

$$\pi_x(\leq n\ R) = \exists^{\leq n} y.R(x,y) = \exists y_1, \ldots, y_n. \bigwedge_{i \neq j} y_i \neq y_j \supset \bigvee_i \neg R(x, y_i) \tag{3.2}$$

$$\texttt{Tree} \equiv \mu X.(\texttt{EmptyTree} \sqcup (\texttt{Node} \sqcap \leq 1\ \texttt{child}^- \sqcap \exists \texttt{child}.\top \sqcap \forall \texttt{child}.X)) \tag{3.3}$$

$$(\mu X.C)_\rho^{\mathcal{I}} = \bigcap \{ \mathcal{E} \subseteq \Delta^{\mathcal{I}} \mid C_{\rho[X/\mathcal{E}]}^{\mathcal{I}} \subseteq \mathcal{E} \} \tag{3.4}$$

$$s \to_E t \text{ iff } \exists (l, r) \in E, p \in \mathcal{P}os(s), \sigma \in \mathcal{S}ub.\ s|_p = \sigma(l) \text{ and } t = s[\sigma(r)]_p \tag{3.5}$$

$$\mathbb{K}[\mathfrak{C}]_r := (G \cup \mathfrak{C}_{min}, M \cup \mathfrak{C}_{max}, I_{\mathfrak{C}} \cap (G \cup \mathfrak{C}_{min}) \times (M \cup \mathfrak{C}_{max})) \tag{3.6}$$

$$0 = \int_{\left\{ s_n(u) > \frac{1}{k} + \mathbf{E}^{\mathcal{A}_n} u \right\}} \left(s_n(u) - \mathbf{E}^{\mathcal{A}_n} u \right) d\mu \geq \frac{1}{k} \mu \left(\left\{ s_n(u) > \frac{1}{k} + \mathbf{E}^{\mathcal{A}_n} u \right\} \right) \tag{3.7}$$

Exercise 7.4. (Homework)
Use `bibtex` to typeset a bibliography of all published literature referenced on exercise sheets 0–7. Make all references as complete as possible, and strive for consistency among the references.
